### DETAILED ACTION

Claims 11-26 are pending in the application.

1. Applicant's arguments, see remarks, filed 12/5/06, with respect to ***Claim Rejections - 35 USC § 112*** have been fully considered and are persuasive. The rejection of claims 19-21 has been withdrawn.
2. Any rejections not reiterated from the previous office action are obviated.

#### **New Rejections necessitated by the amendments to the claims.**

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 11-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation of "cell that expresses CD132, but does not significantly express CD131" is new matter as CD132 or the statement, "does not significantly express CD131" is not provided for in the specification.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 1618

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to how much "amount effective" is required for binding of the composition to cause impairment of the hematologic cancer progenitor cell. The "amount effective" for binding is not adequately provided for in the specification to allow for clear description.

5. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to how much "amount effective" is required for binding of the composition to cause cell death. The "amount effective" for causing cell death is not adequately provided for in the specification to allow for clear description.

6. Claims 11-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to the amount of CD131 would distinguish the hematologic cancer progenitor cell as "not significantly expressing CD131". The recitation "significantly express" is not adequately provided for in the specification to allow for clear description. The specification (p3, paragraph 3) does state that the cancerous cells selectively express CD123 but does not define what the maximum amount of CD131 would be to determine if the cell "does not significantly express CD131".

7. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what "component of the sample" is bound to the compound. The sample of the instant claim comprises an antibody and can comprise other components that are not listed, therefore it is unclear as to which component of the sample is bound to the compound since all of the components are not defined.

8. Claim 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear as to what "compound" is implied in the instant claim.

9. Claim 16 recites the limitation "the compound". There is insufficient antecedent basis for this limitation in the claim.

### ***Conclusion***

No claims are allowed at this time. No art was found in regards to the hematologic progenitor cancer cells that expresses CD132 of the instant claims. Although, applicable art was found in regards to the hematologic progenitor cancer cells that expresses CD123.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
